BOSTON CURB EXCHANGE Where SEVEN METALS stock, both before and since its merger of the bonanza STEVENS and CENTENNIAL MINES (estimated production of more than \$3,000,000) with the rich TOBIN MINE

all now in one big, contiguous mineralized body, was a LEADER IN ACTIVITY. (Price range, 25c to 84c. Now around 40c.) The properties of THE SEVEN METALS MINING COM-PANY are located in the famous Argentine mining district, Clear Creek County, Colorado, where hundreds of millions in Silver have been produced. The company's system of mines is opened up by numerous tunnels, such as the Tobin tunnel, driven in a distance of 1500 feet at about 1600 feet below the apex, and the great Argentine drainage tunnel, driven over one mile at a depth of 2000 feet below the apex of the Tobin mine, making a solid

background of ore of 1000 to 2000 feet. Former production came largely from ore which accumulated in the way of development work, but this ore has run uniformly high in grade and has netted the properties very handsome shipment results, even with silver selling at 50c to 60c an ounce. Outside of such accumulation of ore a comparatively small percentage has been removed. The mines are now well opened up for cheap tunnel operation years ahead, and regular shipments of high grade silver ore are expected to begin almost immediately. We recommend the purchase of SEVEN METALS for sub-
